

# NuGreen Shines Light on Toll Perth

Toll Group, having upgraded over 20 depots to date. Recently they were engaged to provide a lighting solution for Toll's **37,000m<sup>2</sup>** airport facility in Perth. The challenge was to provide an LED lighting solution and design layout to achieve cost savings, maintain lighting levels and increase safety for the logistics giant. By merging various technologies, NuGreen improved visual lighting and site safety while achieving a reduction in energy consumption and immediate energy costs by **70 percent** – future proofing the business from rising energy costs with a fully financed option and no upfront capital expenditure.

**70% to 80%**  
projected **savings**  
on current lighting costs

Existing facility –  
**5,600 tonnes**  
carbon **saved** over 10 years –  
**12,000 tonnes for 2 buildings**

**\$80,000+** saving  
over 10-year maintenance-free  
period \$95K maintenance saving  
over 10 years
