

# TAC

## GEELONG 40KW SOLAR GENERATION SYSTEM

PROJECT COMMENCED JANUARY 2016

Solar Generation Systems are being adopted by more organisations as a way to reduce their carbon emissions with a positive financial outcome.

NuGreen Solutions was engaged by JLL, Impact Investment Group and the TAC to install an additional 40kW of Solar PV, in Geelong, on their sustainable office.

The intelligent design, from NuGreen Solutions, was chosen due to the DC optimised panels to ensure maximum output from the roof space available.

## THE SOLUTION

40kW Solar Generation System

883,531 kWh/year Energy consumption per year

153 X 260Wp Trina Smart Gen2 Pro

23.1% Energy cost savings per year

\$317,876 Saving over 10 years

570 Tonnes CO<sub>2</sub>-e saved over 10 years

## THE BENEFITS

- Reduced peak load energy demand
- Reduced carbon emissions
- Reduced energy costs
- Maintained & monitored by NuGreen Solutions
- Long term warranty
- Generation guarantee
